Product description

The LPM2100 bm is a multi-band NB-IoT + GSM quad-band dual-mode module that complies with 3GPP Release 13. The module has 98 pins, $(23.6 \pm 0.15) \text{ mm} \times (19.9 \pm 0.15) \text{ mm} \times (2.2 \pm 0.15) \text{ mm}$, which can meet almost all M2M requirements. The module is a chip module and is packaged in an LCC to meet the hardware interface between the customer's motherboards. The LPM2100 bm series modules feature low power technology with standby power consumption of less than 1mA and low sleep down to 5uA.

Product advantages

- ❖ Support NB-IoT
- ❖ Support GSM/GPRS-CLASS12
- ❖ Super power saving, PSM mode $\leq 5\mu\text{A}$
- ❖ LCC package for M2M design
- ❖ Stable performance and high cost performance
- ❖ CCC ROHS certification
- ❖ Wide range of application scenarios
